Certified Ratings for Sound and Air Performance

Hartzell Fan, Inc. certifies that the Series 53C Direct Drive, Vaneaxial Fan, C-faced motor with internal vane section shown on pages 9 and 10, and the Series 54, Belt Drive Vaneaxial VA on pages 11 through 16 are licensed to bear the AMCA seal for air and sound performance. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirements of the AMCA Certified Ratings Program.

Sound performance data is available on request. Please contact the factory and ask for Engineering Publication #SD-110.

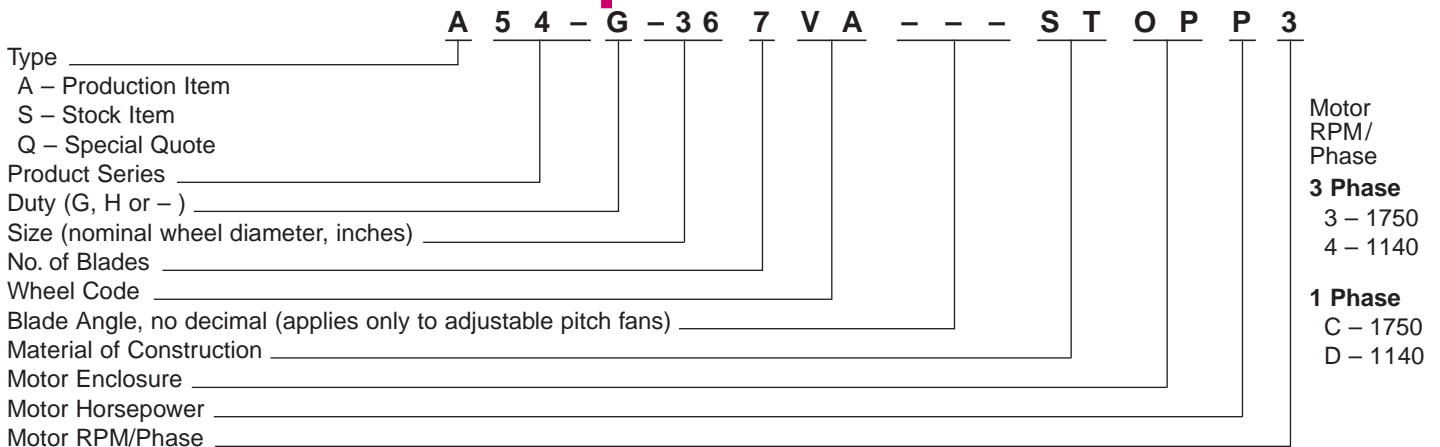

Certified Ratings for Air Performance

Hartzell Fan, Inc. certifies that the Series 53 Direct Drive, Vaneaxial Fan shown on page 8 is licensed to bear the AMCA seal for air performance. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and comply with the requirements of the AMCA Certified Ratings Program.

Hartzell Fan, Inc. certifies that the Series 25, Miniature Vaneaxial Blower, shown on page 7, and the Vaneaxial Fan, Belt Drive, Series 54, shown on pages 11, 12 and 17, is authorized to bear CE Marking in accordance with Machinery Safety Directive 98/37/EC of the European Union. Reference Technical File E.S. 13.2.1.

Hartzell Model Explanation

Motor Horsepower

Horsepower	1/4	1/3	1/2	3/4	1	1 1/2	2	3	5	7 1/2	10	15	20	25	30	40	50	60	75	100	125	150	200
Code Letter	D	E	F	G	H	I	J	K	L	M	N	O	P	Q	R	S	T	U	V	W	X	Y	Z

EXAMPLE:

Assume a required performance of 23,200 CFM, at 3" SP, standard air. Reading across the Series 54 Rating Table on page 15, we find a 36" fan with "G" (General Industrial) Duty construction and a performance of 23,500 CFM at 3" SP. RPM of 1527 and brake horsepower of 19.7. This unit has a 7-blade, type "VA" propeller. Motor horsepower is 25.

The model code can be constructed as follows: Type will be a production item (code A), product series for the Vaneaxial Fan, Type VA is 54, size of the wheel is 36", "G" (General Industrial) Duty construction, number of blades is 7, blade is VA, material of construction is steel (code ST), motor is open. Protected 1.15 S.F. (code OP), motor horsepower is 20 (code P), and motor RPM/phase is 1750 (code 3). This fan is also available in Hartzell HRS.

Note: All other informational fields must be filled with hyphens/dashes (-) if they are not applicable to the fan being considered.

This bulletin lists Hartzell's complete line of Vaneaxial Fans and accessories. More than 70 Hartzell offices can provide specific performance and installation data to meet your requirements. Call your Hartzell representative for assistance. Visit our website (www.hartzellfan.com) or call toll-free (1-800-336-3267) for the name of your Hartzell representative.

Certificates of Design Assessment are issued by the American Bureau of Shipping. The assessment is a representation by the Bureau as to the degree of compliance the design exhibits with applicable sections of the Rules. The certificates, by itself, do not reflect that the products are Type Approved.

Vaneaxial Fan

Construction Features

Vaneaxial fans are highly efficient axial flow fans designed for static pressures up to 12". They also offer the compactness and in-line configuration of axial flow fans.

The Vaneaxial is the workhorse of the Hartzell line of duct type fans. Standard fans are designed for low pressure applications from free air to 11/4" SP. Duct Axial® fans are efficient air movers from 1" to 4" at low speeds and with low noise characteristics. The Vaneaxial, however, works up to 12" SP, moving large volumes of air at comparatively low tip speeds.

The key part in a Vaneaxial fan is the impeller. The Hartzell airfoil, 7-bladed, one-piece cast aluminum impeller was developed after extensive scientific study and is designed to move large volumes of air at high static pressures. A high hub-to-blade size ratio and 7-bladed configuration effectively prevents the backflow of air, increasing the impeller's efficiency at high pressures.

Vaneaxial fans are available in both direct and belt drive, sizes 12" to 60". Hartzell offers four types of vaneaxial fans:

- Series 53, Direct Drive, Type VA, sizes 18" to 42".
- Series 53C, Direct Drive, Type VA, with internal vane section, sizes 18" to 60".
- Series 54, Belt Drive, Type VA, sizes 12" to 60", wide performance range. Available in both "G" (General Industrial) Duty and "H" (Heavy Industrial) Duty. "G" Duty construction incorporates pivot style motor mounting and flange mounted ball or roller bearings. Applications limited by selection point and motor horsepower, see page 11 for details. "H" Duty construction incorporates motor mounting platform and pillow block foot mounted ball or roller bearings. Available in all sizes, see page 12 for details.
- Series 54, Belt Drive, Type VB, sizes 18" to 48". Lower blade pitch and higher hub-to-diameter ratio makes the "VB" more efficient at high temperatures than standard Vaneaxial. Available only in "H" (Heavy Industrial) Duty construction.
- Series 55, Belt Drive, High Temperature Vaneaxial, Type VA or VB, Sizes 12" to 60". In contrast to standard Vaneaxials, design configuration places the drive assembly on the negative pressure side of the propeller, drawing ambient air outside the system through the belt tube, in and over the belts and bearings. This allows use in applications where the fan is handling air up to 350°F.

Type VA Impeller

Type VB Impeller

Series 54,
Type VA, "G" General
Industrial Duty

General Features

- **Cast Aluminum Alloy airfoil type impeller** with ample safety factors (non-ferrous for non-sparking) individually ground for balance. Dynamically balanced to ensure vibration-free operation.
- **Housings** are heavy gauge hot-rolled steel with continuously welded steel drum and rolled steel flanges.
- **Bearings** on belt drive units are either deep row radial ball type and self-aligning, shielded and mechanically sealed in cast iron on malleable housings, or are double row spherical roller bearings. Long inner race insures load distribution, providing a high radial and thrust load capacity. Both are a relubricable type for continuous service with lubrication tubes extended to the exterior of fan housing as standard. Lubrication tubes extending from motor to exterior of fan housing are standard on Direct Drive Fans.
- **Straightening Vanes** – Nine heavy gauge steel discharge guide vanes are welded in the casing. Aerodynamically designed straightening vanes maximize efficiency. Vanes minimize turbulence, converting velocity pressure to static pressure for increased capability.
- **Shafts** are high strength steel, ground and polished.
- **V-Belt Drives** are oversized for longer life and continuous duty. Belts are oil, heat and static resistant type.
- **Sheaves** are fixed pitch as standard. Variable pitch sheaves are available upon request.
- **Motors** – Totally enclosed motors are standard on Direct Drive Vaneaxials. Belt Drive models feature open-end, drip-proof motor out of air stream as standard. Totally enclosed fan cooled and other special motors can be furnished at extra cost.
- **Welded steel motor base plate** on direct and belt drive models.
- **Protective coatings** – See page 27.
- **Accessories** – See pages 26 and 27.
- **Installation position** – Can be used in any position from horizontal to vertical.

Drive and Mounting Arrangements

Arrangement #4

For direct drive. Wheel overhung on motor shaft. Motor supported within casing. For vertical, horizontal or inclined mounting positions.

Arrangement #9

For belt drive, wheel overhung on a shaft supported by bearings mounted within casing. Designed for mounting of motor on outside of casing. For vertical, horizontal or inclined mounting positions.

Mounting Arrangements

Duct Mounting

Inlet and discharge flanges allow direct mounting to duct work, providing the duct system is structured to support the unit. Can be mounted in the vertical, horizontal or inclined position.

Ceiling Suspension

Side-angle supports enable suspension of unit from the ceiling. Can be used with vibration isolators. Also available for vertical mountings.

Mounting Feet

Bolted to the inlet and discharge flange, mounting feet allow positioning of the unit on the floor, ceiling, wall or platform. Can be used with vibration isolators.

Floor Mounting

Alternate method of mounting fans in vertical position. Brackets ensure rigid, flush mounting of fan to floor. Specify vertical up or vertical down air flow.

Roof Mounting

When desirable, the belt driven Vaneaxial fan can be mounted as a roof exhaustor. Together with a stack cap and panel, the three elements combine to provide a roof exhaustor unit with high static pressure capabilities. Back draft dampers offer weatherproof closure for vertical air discharge.

CFM Limitation for Damper Operation

CFM	FAN SIZE					
	12"	14"	18"	21"	24"	26"
Minimum	990	1355	2250	3070	4020	4725
Maximum	2435	3330	5535	7560	9895	11630

CFM	FAN SIZE					
	29"	36"	42"	48"	54"	60"
Minimum	5885	9095	12395	16165	20485	25315
Maximum	14490	22385	30515	39795	50425	62310

For performance, refer to the appropriate Vaneaxial Rating Table, allowing 1/8" SP resistance for the stack cap. Minimum velocity required through stack cap for damper operation is 1300 FPM, maximum is 3200 FPM.

Selection Guide

How To Use Capacity Tables

Select size, RPM and BHP for a given air delivery and pressure of a vaneaxial fan from the rating tables.

Performance ratings are based on standard air conditions, sea level 70°F and 29.92 inches barometric pressure giving an air density of .075 lbs. per cubic foot. The specific gravity of air equals 1.00 at these conditions.

If non-standard temperature or altitude is involved, correct to standard air density (see Table 1).

For speeds above ratings consult factory.

Altitude – Temperature Correction

For an application where the fan operates at other than ambient conditions (temperature, altitude, or both), correction factors must be applied to the selection of the fan. In addition, the standard construction of the fan must be modified.

Correction factors for temperatures and altitudes are provided in Table 1. When a fan operates at other than ambient conditions, the correction factors in Table 1 will be required to correct static pressure and horsepower.

First select size, RPM and BHP of the fan needed. If temperature or altitude is involved, correct to standard air.

Table 1 Combined Altitude/Temperature Correction Factors

Temp.* (°F)	-50	-25	0	25	50	70	100	125	150	175	200	225	250	275	300	325	350
Factor	0.77	0.82	0.87	0.92	0.96	1.00	1.06	1.10	1.15	1.20	1.25	1.29	1.34	1.39	1.43	1.48	1.53

Alt.** (Ft.)	0	1,000	2,000	3,000	4,000	5,000	6,000	7,000	8,000	9,000	10,000
Factor	1.00	1.04	1.08	1.12	1.16	1.20	1.25	1.30	1.35	1.40	1.46

Above table has inverted values. Actual density is the reciprocal of the above values.

*At sea level. **At 70°F.

For corrections involving both temperature and altitude, correction factors should be multiplied.

Example: 150°F at 7,000 ft.: Temperature factor 1.15 x altitude factor 1.30 = 1.50 combined correction factor.

Discharge Cones

Ratings shown in this bulletin are for vaneaxial fans with inlet and outlet ducts of the same diameter as the fan. Discharge cones may be used on the vaneaxial fans to adapt to larger diameters (see Fig. A). The result is a static pressure regain.

Table 2 shows the amount of additional static pressure capability, which results from using the discharge cone. Add the amount of .45 (VP₁ - VP₂) to the vaneaxial fan's static pressure, or fan with cone (SP₂):

$$SP_2 = SP_1 + .45(VP_1 - VP_2)$$

Discharge cones may also be used to transform large ducts to the vaneaxial fan inlet size (see Fig. B). Since these cones have gently tapered sides, the friction loss is negligible, about .08 x the difference in velocity pressures (see Table 3).

If the fan is to be used with ducts smaller in diameter than the unit (see Fig. C), the difference in velocity pressure across the cone must be added to the static pressure for which the vaneaxial fan is used.

Example: Assume the required performance to be 25,000 CFM at 1.80" SP, 225°F and 2,000 feet altitude.

1. Temperature factor 1.29 x altitude factor 1.08 = 1.39 combined correction factor.
2. 1.80" SP x 1.39 = 2.5" SP for 70°F at sea level.
3. A Series 55 Belt Drive Vaneaxial, 36" diameter fan selected from the rating table (page 22) for the new conditions show 25,000 CFM, 2.5" SP at 1,595 RPM at 21.8 peak fan BHP. The 225°F temperature necessitates Series 55, high temperature construction.
4. Correct the horsepower and static pressure in item 3 to non-standard performance by dividing by the factor:

$$2.5" \text{ SP} \div 1.39 = 1.80" \text{ SP}$$

$$21.8 \text{ BHP} \div 1.39 = 15.7 \text{ BHP}$$
5. Final performance of the unit at the assumed conditions: 25,000 CFM at 1.80" SP, 1,595 RPM, 15.7 BHP at 225°F and 2,000 feet altitude.
6. Size motor for cold startups or contact your Hartzell Representative for assistance. Use a special high altitude motor if altitude exceeds 3,300 feet.

High Temperature Construction

Direct Drive Duct Fans – Series 25, 53 and 53C

Temperature: 104°F standard.

104° to 140°F – Class F insulation required on motor.

140° to 176°F – Class H insulation required on motor.

176° to 212°F – Class HH insulation required on motor.

For direct drive units with airstream temperatures above 212°F, contact factory.

Belt Drive Vaneaxial Fans – Series 54 and 55

Maximum Temperature for the Series 54 is 200°F.

Maximum Temperature for the Series 55 is 350°F. For applications with airstream temperatures between 200°F and 350°F, high temperature construction consists of purging fan bearings with high temperatures grease as well as opening the end of the bearing cover so that cool ambient air is drawn over the belts and bearings. If the motor ambient temperature is higher than 104°F, specially insulated motors are required. For airstream temperatures above 350°F, contact factory.

Series 25 Miniature Vaneaxial Blower

Series 25

- **Applications** – Handling relatively clean and corrosive-free air at temperatures not exceeding the motor rating. Designed for flange mounting in any position.
- **Performance** – from 70 CFM to 1,000 CFM and pressures from 0" SP to 3/4" SP. Available in sizes 8 and 9.
- **Housings** – are continuously welded heavy gauge, hot rolled steel with flanged punched inlet and outlet connections for easy installation.
- **Axial Impellers** – are 5-bladed true airfoil, solid cast aluminum with straight bored and keyed hub and precision balanced.
- **Standard Finish** – Standard fans are pretreated and painted with blue industrial duty air dry enamel. alternate coatings are available for corrosive environments.
- **Motors** – are totally enclosed long life industrial type foot mounted as standard. Special motors are available upon request.
- **Accessories** – See pages 26 and 27.

CE Hartzell Fan, Inc. certifies that the Miniature Vaneaxial Blower, Series 25, shown on Page 7, is authorized to bear CE Marking in accordance with Machinery Safety Directive 98/37/EC of the European Union. Reference Technical File E.S.13.2.1.

Performance certified is for installation Type D: ducted inlet/ducted outlet. Performance data is based on standard air conditions (0.075 #/ft.³). Performance ratings do not include the effects of appurtenances (accessories).

Bold-type information provided in the Rating Table above is needed when preparing a model code. Refer to page 2 for more information.

Series 53, Direct Drive, Type VA

Series 53

- **Applications** – Handling relatively clean and corrosive-free air at temperatures not exceeding the motor rating.
- Available in sizes 18" to 42" ... **performance** from 3410 CFM at 1" to 23,900 CFM at 3½" SP.
- **Impeller** – 7-blade airfoil design, cast aluminum construction mounted with split taperlock bushing for easy installation and removal. Large hub to blade ratio prevents backflow of air, moves large volumes of air at high pressures.
- **Housings** – Heavy gauge, hot rolled steel housing with continuously welded steel drum and rolled steel flanges.
- **Rigid motor mounts** – Provide support for foot-mounted motors.
- **Motors** – Totally enclosed fan cooled are standard. Special motors are available upon request. Extended motor leads to exterior of housing are available as an option.
- **Guide Vane Section** – Separate vane section designed to insure maximum efficiency in converting velocity pressure to static pressure with minimal turbulence.
- **Extended Lube Tubes** from motor to exterior of fan housing are standard.
- **Accessories** – See pages 26 and 27.
- **Protective coatings** – See page 27.

Hartzell Fan, Inc. certifies that the Series 53, Direct Drive Vaneaxial Fan, shown hereon, is licensed to bear the AMCA seal for air performance. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and comply with the requirements of the AMCA Certified Ratings Program.

Series 53C, Direct Drive, Type VA with Internal Vane Section

Series 53C

- **Applications** – Handling relatively clean and corrosive-free air at temperatures not exceeding the motor rating.
- Available in sizes 18" to 60"...**performance** from 3850 CFM at free air to 105,000 CFM at 5" SP.
- **Impeller** – 7-blade airfoil design, cast aluminum construction mounted with split taperlock bushing for easy installation and removal.
- **Housings** – Heavy gauge, hot rolled steel housing with continuously welded steel drum and rolled steel flanges with **internal guide vane** section designed to insure maximum efficiency in converting velocity pressure to static pressure with minimal turbulence.
- **Rigid "C" face motor mounts** – Provide support for motors.
- **Motors** – Totally enclosed fan cooled "C" face are standard. Special motors are available upon request. Extended motor leads to exterior of housing are standard.
- **Extended Lube Tubes** from motor to exterior of fan housing are standard.
- **Accessories** – See pages 26 and 27.
- **Protective coatings** – See page 27.

Hartzell Fan, Inc. certifies that the Series 53C Direct Drive, Vaneaxial Fan, C-faced motor with internal vane section shown hereon is licensed to bear the AMCA seal for air and sound performance. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirements of the AMCA Certified Ratings Program.

Series 54, Belt Drive, Type VA, "G" Duty

Stock Models Available in Hartzell's HRS Program.

Series 54, "G" (General Industrial) Duty Construction

Hartzell Fan, Inc. certifies that the Series 54, Belt Drive Vaneaxial Fan, shown hereon, is licensed to bear the AMCA seal for air and sound performance. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirements of the AMCA Certified Ratings Program.

Hartzell Fan, Inc. certifies that the Vaneaxial Fan, Belt Drive, Series 54, shown on Page 11, is authorized to bear CE Marking in accordance with Machinery Safety Directive 98/37/EC of the European Union. Reference Technical File E.S.13.2.1.

- **"G" (General Industrial) Duty Construction** – Designed for industrial service with value, application, and performance range taken together. Available in sizes 12" to 60"...performance from 1,000 to 92,000 CFM, and static pressure capability up to 6" W.G.. See pages 13-16.
- **Applications** – Where it is advantageous to have the motor out of the air-stream or the versatility of a belt drive configuration. Maximum temperature 180°F. In installations where air is at elevated temperatures or contaminated, Hartzell Series 55 fans should be used; see page 20.
- **Impellers** – 7-blade, airfoil design, cast aluminum construction mounted with split taperlock bushing for easy installation and removal. Large hub to blade ratio prevents backflow of air.
- **Housing** – One-piece, heavy gauge hot rolled steel housing with continuously welded steel drum and rolled steel flanges.
- **Guide Vanes** – Nine heavy gauge steel discharge guide vanes are welded in the fan housing.
- **Motor Out of the Airstream** – Exterior mounting on fully adjustable pivot style motor base. Open-end motors are standard. Motors larger than 30 HP will be shipped separately for mounting on unit at job site. Motor HP and frame size limits are identified in the dimension table.
- **Bearings** are heavy duty ball or roller type, in cast iron flange mount housings, selected for minimum L-50 Life of 200,000 hours and include extended lubrication fittings as standard. Shafts are turned ground and polished 1045 steel sized to operate well below critical speed.
- **Drives** are fixed pitch as standard. Variable pitch drives are available upon request.
- **High Temperature Construction** – See Series 55 dimensions on page 20.
- **Accessories** – See pages 26 and 27.
- **Protective Coatings** – See page 27 .

Series 54, Belt Drive, Type VA, "H" Duty

**Series 54,
"H" (Heavy Industrial)
Duty construction**

Hartzell Fan, Inc. certifies that the Series 54, Belt Drive Vaneaxial Fan VA, shown hereon, is licensed to bear the AMCA seal for air and sound performance. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirements of the AMCA Certified Ratings Program.

Hartzell Fan, Inc. certifies that the Vaneaxial Fan, Belt Drive, Series 54, shown on page 12, is authorized to bear CE Marking in accordance with Machinery Safety Directive 98/37/EC of the European Union. Reference Technical File E.S. 13.2.1.

- **"H" (Heavy Industrial) Duty Construction** – Designed for heavyweight service with ruggedness, use, and performance range taken together. Available in sizes 12" to 60"...performance from 1,000 to 116,000 CFM, and static pressure capability up to 8" W.G.. See pages 13-16.
- **Applications** – Where it is advantageous to have the motor out of the airstream or the versatility of a belt drive configuration. Maximum temperature 180°F. In installations where air is at elevated temperatures or contaminated, Hartzell Series 55 fans should be used; see page 20.
- **Impellers** – 7-blade, airfoil design, cast aluminum construction mounted with split taperlock bushing for easy installation and removal. Large hub to blade ratio prevents backflow of air, moves large volumes of air at high pressures. Applications are limited to maximum tip speed of 22,000 FPM.
- **Housing** – One-piece, heavy gauge hot rolled steel housing with continuously welded steel drum and rolled steel flanges.
- **Guide Vanes** – Nine heavy gauge steel discharge guide vanes are welded in the fan housing.
- **Motor Out of the Airstream** – Exterior mounting on fully adjustable platform style motor base supported by external housing assembly base weldment. Open-end motors are standard. Motors larger than 30 HP will be shipped separately for mounting on unit at job site. Motor HP and frame size limits are identified in the dimension table.
- **Bearings** are heavy duty ball or roller type, in cast iron pillow block housings, selected for minimum L-50 Life of 500,000 hours for horizontal fans; and 300,000 for vertical fans, and include extended lubrication fittings as standard. Shafts are turned ground and polished 1045 steel sized to operate well below critical speed.
- **Drives** are fixed pitch as standard. Variable pitch drives are available upon request.
- **High Temperature Construction** – See Series 55 dimensions on page 20.
- **Accessories** – See pages 26 and 27.
- **Protective Coatings** – See page 27.

Performance certified is for belt drive fans, installation Type D: ducted inlet/ducted outlet. Power rating (BHP) includes transmission losses. Performance ratings do not include the effects of appurtenances (accessories).

To complete model code for your selection, add class of construction ("G" or "H"), motor enclosure code, motor nameplate horsepower code, and motor speed code. Refer to page 2 for additional model code information.

Performance certified is for belt drive fans, installation Type D: ducted inlet/ducted outlet.
Power rating (BHP) includes transmission losses.
Performance ratings do not include the effects of appurtenances (accessories).

To complete model code for your selection, add class of construction ("G" or "H"), motor enclosure code, motor nameplate horsepower code, and motor speed code. Refer to page 2 for additional model code information.

Performance Data – Series 54, Type VA

Size 54 – A54- _ -547VA---ST_____

Performance certified is for belt drive fans, installation Type D: ducted inlet/ducted outlet.
Power rating (BHP) includes transmission losses.
Performance ratings do not include the effects of appurtenances (accessories).

To complete model code for your selection, add class of construction ("G" or "H"), motor enclosure code, motor nameplate horsepower code, and motor speed code. Refer to page 2 for additional model code information.

Series 54, Belt Drive, Type VB, "H" Duty

**Series 54,
"H" (Heavy Industrial)
Duty construction**

CE Hartzell Fan, Inc. certifies that the Vaneaxial Fan, Belt Drive, Series 54, shown on page 17, is authorized to bear CE Marking in accordance with Machinery Safety Directive 98/37/EC of the European Union. Reference Technical File E.S. 13.2.1.

- **"H" (Heavy Industrial) Duty Construction** – Designed for heavyweight service with ruggedness, use, and performance range taken together. Available in **sizes** 18" to 48"...**performance** from 1,500 to 54,000 CFM, and static pressure capability up to 12" W.G.. See pages 18-19.
- **Applications** – Developed to meet the demand for a low volume, high pressure requirement. Lower blade pitch and a higher hub-to-diameter ratio makes the "VB" the most effective Vaneaxial at high pressures while moving relatively smaller volumes of air. Maximum temperature 180°F.
- **Sizes 18" to 48"...****performance** from 3500 to 62,000 CFM.
- **External dimensions and construction** identical to standard Vaneaxial fans.
- **Impellers** – 7-blade airfoil, cast aluminum construction. Designed to move low volumes of air at high static pressures.
- **Housings** – One-piece, heavy gauge, hot rolled steel housing with continuously welded steel drum and rolled steel flanges.
- **Guide Vanes** – Nine heavy gauge steel discharge guide vanes are welded in the fan housing.
- **Motor out of the air stream** – Exterior mounting. Propeller shaft rotates in two heavy duty bearings mounted on steel supports welded to the inner shell with "T" reinforcements. Open end motors are standard. Motors larger than 30 HP will be shipped separately for mounting on unit at job site.
- **Drives** are fixed pitch as standard. Variable pitch drives are available upon request.
- **Extended Lube Tubes** from bearings to exterior of fan housing are standard.
- **High Temperature Construction** – see Series 55 dimensions on page 20.
- **Accessories** – See pages 26 and 27.
- **Protective coatings** – See page 27.

Performance certified is for belt drive fans, installation Type D: ducted inlet/ducted outlet.
Power rating (BHP) includes transmission losses.
Performance ratings do not include the effects of appurtenances (accessories).

To complete model code for your selection, add motor enclosure code, motor nameplate horsepower code, and motor speed code. Refer to page 2 for additional model code information.

Series 55, Belt Drive, Type VA & VB

Series 55

ABS Certificate
of Design Assessment
Received

side of the propeller, drawing ambient air from outside the fan in and over the belts and bearings. Allows use in temperatures up to 350°F. if the ambient temperature does not exceed the motor rating.

- **Sizes** 12" to 60"...**performance** from 1,000 to 105,000 CFM. Series 55, high temperature Vaneaxials are available with either the "VA" or "VB" type wheel. Performance for a "VA" or "VB" impeller in Series 55 construction is the same as standard performance. See pages 21-23 for Series 55 with "VA" impeller, pages 24-25 for "VB" impellers.
- **Impellers** – Both "VA" and "VB" type impellers are a one-piece, cast aluminum airfoil design. Type VA are mounted with split taperlock bushing. Type VB are straight bore mounted with shaft shoulder. Both are designed to work efficiently at high static pressures.
- **Housing** – Two-piece, heavy gauge hot rolled steel housing with continuously welded steel drum and rolled steel flanges.
- **Vane Section** – Separate vane section containing guide vanes is located on discharge side of fan.
- **Motor out of the air stream** – Exterior mounting. Propeller shaft rotates in two heavy duty bearings mounted on steel supports welded to the inner shell with "T" reinforcements. Open end motors are standard. Motors larger than 30 HP will be shipped separately for mounting on unit at job site.
- **Drives**—are fixed pitch as standard. Variable pitch drives are available upon request.
- **Extended Lube Tubes** from bearings to exterior of fan housing are standard.
- **Accessories** – See pages 26 and 27.
- **Protective coatings** – See page 27.

- **Applications** – For installations where air is hot or contaminated, the Series 55 high temperature vaneaxial will provide substantially longer service life than standard belt drive vaneaxial fans.
- **High temperature construction** – Belts, bearings, sheave and shaft are enclosed and protected from the air stream. Special guide vane section on discharge side allows for location of drive compartment on the negative-pressure (suction)

Performance certified is for belt drive fans, installation Type D: ducted inlet/ducted outlet.
 Power rating (BHP) includes transmission losses.
 Performance ratings do not include the effects of appurtenances (accessories).

To complete model code for your selection, add motor enclosure code, motor nameplate horsepower code, and motor speed code. Refer to page 2 for additional model code information.

Performance certified is for belt drive fans, installation Type D: ducted inlet/ducted outlet.
Power rating (BHP) includes transmission losses.
Performance ratings do not include the effects of appurtenances (accessories).

To complete model code for your selection, add motor enclosure code, motor nameplate horse-power code, and motor speed code. Refer to page 2 for additional model code information.

Performance certified is for belt drive fans, installation Type D: ducted inlet/ducted outlet.
Power rating (BHP) includes transmission losses.
Performance ratings do not include the effects of appurtenances (accessories).

To complete model code for your selection, add motor enclosure code, motor nameplate horse-power code, and motor speed code. Refer to page 2 for additional model code information.

Options and Accessories

Companion Flanges

Drilled to fit the flanges of the Vaneaxial Fan; allows easy installation. Available for "G" (General Industrial) or "H" (Heavy Industrial) Duty construction fans.

Access Door

For maintenance of the internal parts of Vaneaxial Fans. Available for Series 53 and 55 only. Inspection Door only available on Series 54, "G" (General Industrial) or "H" (Heavy Industrial) Duty construction fans.

Inlet and Outlet Cones

Available for adapting to larger diameters. The result is a static pressure regain. Available for "G" (General Industrial) or "H" (Heavy Industrial) Duty construction fans.

Mounting Feet

Bolted to inlet and discharge flanges, mounting feet allow positioning of the Vaneaxial Fan on the floor, ceiling, wall or platform. Can be used with vibration isolators. Available for "G" (General Industrial) or "H" (Heavy Industrial) Duty construction fans.

Inlet Bell

Inlet orifice may be used in place of the inlet duct in installations where no duct work precedes the fan. Available for "G" (General Industrial) or "H" (Heavy Industrial) Duty construction fans.

Ceiling Suspension

Side mounting brackets can be used with vibration isolators. Shown with supports for horizontal mount. Also available for vertical mountings. Available for "G" (General Industrial) or "H" (Heavy Industrial) Duty construction fans.

Vaneaxial Fan with Bomb Bay Construction

The Bomb Bay arrangement offers easy access to the drive assembly. Unlatching the Bomb Bay section facilitates maintenance of belts, bearings, propeller and shaft of belt drive units and motor and propeller of direct drive units without removing the fan from the system. Available for fans with "H" (Heavy Industrial) Duty construction only.

Dimensions on Bomb Bay construction vary from standard units. Request certified prints.

Hub Covers

Hub covers for the VA and VB blades are available to prevent material build-up in the hub area of the wheel. Hub covers also enhance a more laminar airflow. Available for "G" (General Industrial) or "H" (Heavy Industrial) Duty construction fans.

Shaft Seal and Slinger

A neoprene shaft seal and slinger are available for Series 55 belt drive units in corrosive applications. A shaft seal does not make the inner cylinder gas tight.

Guard

Spiral ring guard offers protection on intake or discharge side. Available for "G" (General Industrial) or "H" (Heavy Industrial) Duty construction fans.

Combination Motor Cover and Belt Guard

Designed to fit all belt drive Vaneaxial Fans. Covers are vented. Specify horizontal or vertical mounting. Available for "G" (General Industrial) or "H" (Heavy Industrial) Duty construction fans.

Belt Guard

Covers motor sheave and belts outside fan housing. Available for "G" (General Industrial) or "H" (Heavy Industrial) Duty construction fans.

Caution: The drive assembly or the periphery of the blades of a fan less than seven (7) feet above the floor or working level must be guarded to be in accordance with OSHA regulations.

Protective Coatings

Series 55 high temperature Vaneaxial Fans should always be used in applications where the air is tempered or contaminated. Hartzell offers a variety of coatings to meet most industrial corrosive problems. Contact your local Hartzell representative for competent technical help.

Roof Mounted

Together with a stack cap and panel, the Vaneaxial Fans can be mounted as roof exhausters. In combination, these three units provide a roof exhauster unit with high static pressure capabilities. Back draft dampers offer weatherproof closure for vertical air discharge.

For performance, refer to the appropriate Fan Rating Table, or Performance Curve, allowing 1/8" SP resistance for the stack cap. See page 5 for CFM limits.

Sound Muffler

This sound attenuative device is a simple lined tube that can be used on either the intake or exhaust side of a Vaneaxial Fan to reduce the noise. It cannot be used in wet atmosphere or with air velocities over 5000 FPM or above 250 (in the airstream). The resistance to airflow is negligible since the internal surface is fairly smooth and the internal diameter of the muffler is the same as the fan with no internal obstruction to impede airflow. Available for "G" (General Industrial) or "H" (Heavy Industrial) Duty construction fans.

In general, the muffler should be mounted between the fan and the area of concern (the listener).

If both the intake and exhaust of the fan are critical, use a muffler on both sides of the fan.

The outstanding features of this muffler are:

- The typical attenuation for fans with discharge velocities from 1500-3000 FPM is approximately as follows for one muffler:

Band	1	2	3	4	5	6	7	8
dB Attenuation	0	1	3	10	13	12	10	8

- For one muffler the reduction in some value is approximately 35%. With a muffler on both intake and exhaust, the noises are reduced approximately 50%.
- There is no appreciable static pressure loss when one or two mufflers are inserted into a duct system.
- The mounting flanges match the corresponding fan flanges and are drilled for easy attachment. By using flexible connections between fan and muffler, the sound attenuation is helped, particularly in the lower bands.
- The absorbent material has a black rubberized surface next to the airstream which prevents erosion up to 5000 FPM velocity, and is held in place with an expanded metal liner.

SAFETY ACCESSORIES, APPLICATION AND USE WARNING

The safe application and use of equipment supplied by Hartzell Fan, Inc. is the responsibility of the installer, the user, the owner, and the employer. Since the application and use of its equipment can vary greatly, Hartzell Fan, Inc. offers various product types, optional safety accessories, and sound performance data per laboratory tests. Hartzell Fan, Inc. sells its equipment with and without safety accessories, and accordingly, it can supply such safety accessories only upon receipt of an order. The need for safety accessories will frequently depend upon the type of system, fan location and operating procedures being employed. The proper protective safety accessories to meet company standards, local codes, and the requirements of the Occupation Safety and Health Act must be determined by the user since safety requirements vary depending on the location and use of the equipment. If applicable local conditions, standards, codes or OSHA rules require the addition of the safety accessories, the user should specify and obtain the required safety accessories from Hartzell Fan, Inc. and should not allow the operation of the equipment without them.

Owners, employers, users and installers should read "RECOMMENDED SAFETY PRACTICES FOR USERS AND INSTALLERS OF INDUSTRIAL AND COMMERCIAL FANS" published by the Air Movement and Control Association International, Inc., 30 West University Drive, Arlington Heights, Illinois 60004. A copy of this publication is enclosed with each fan shipped from Hartzell Fan, Inc., and is available upon request at Hartzell's office in Piqua, Ohio 45356.

Please contact Hartzell Fan, Inc. or your local Hartzell representative for more information on product types, safety accessories, and sound performance estimates.

Remember, the selection of safety accessories and the safe application and use of equipment supplied by Hartzell Fan, Inc. is **your** responsibility.

Hartzell Warranty

LIMITED WARRANTIES

Hartzell represents to Buyer that any goods to be delivered hereunder will be produced in compliance with the requirements of the Fair Labor Standards Act of 1938 as amended.

Hartzell also warrants to Buyer its goods to be free from defects in workmanship and material under normal use and service for one (1) year after tender of delivery by Hartzell, plus six months allowance for shipment to approved stocking dealers and distributors. No warranty extends to future performance of goods and any claims for breach of warranty or otherwise accrues upon tender of delivery. The foregoing constitute Hartzell's sole and exclusive warranties and are in lieu of all other warranties, whether written, oral, express, implied or statutory.

LIMITATION OF LIABILITY FOR BREACH OF WARRANTY

Hartzell's obligation for any breach of warranty is limited to repairing or replacing, at its option, without cost to Buyer at its factory any goods which shall, within such a warranty period, be returned to it with transportation charges prepaid, and which its examination shall disclose to its satisfaction to have been defective. Any request for repair or replacement should be directed to Hartzell Fan, Inc., P.O. Box 919, Piqua, Ohio 45356. Hartzell will not pay for any repairs made outside its factory without its prior written consent. This does not apply to any such Hartzell goods which have failed as a result of faulty installation or abuse, or incorrect electrical connections or alterations, made by others, or use under abnormal operating conditions or misapplication of the goods.

LIMITATION OF LIABILITY

To the extent the above limitation of liability for breach of warranty is not applicable, the liability of Hartzell on any claim of any kind, including negligence, for any loss or damage arising out of or connected with, or resulting from the sale and purchase of the goods or services covered by these Terms and Conditions of Sale or from the performance or breach of any contract pertaining to such sale or purchase or from the design manufacture, sale, delivery, resale, installation, technical direction installation, inspection repair, operation or use of any goods or services covered by these Terms and Conditions shall, in no case exceed the price allocable to the goods or services which gave rise to the claim and shall terminate one year after tender of delivery of said goods or services, plus six months allowance for shipment to approved stocking dealers and distributors. In no event will Hartzell be responsible or liable for any labor or other incidental costs associated with the removal or replacement of defective products or materials.

In no event whether as a result of breach of contract, or warranty or alleged negligence, defects, incorrect advice or other causes, shall Hartzell be liable for special or consequential damages, including, but not limited to, loss of profits or revenue, loss of use of the equipment or any associated equipment, cost of substitute equipment, facilities or services, down time costs, or claims of customers of the Buyer for such damages. Hartzell neither assumes nor authorizes any person to assume for it any other liability in connection with the sale of its goods or services.

NO IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS

HARTZELL DOES NOT WARRANT THAT SAID GOODS ARE OF MERCHANTABLE QUALITY OR THAT THEY ARE FIT FOR ANY PARTICULAR PURPOSE. THERE IS NO IMPLIED WARRANTY OF MERCHANTABILITY AND THERE IS NO IMPLIED WARRANTY OF FITNESS.
